MOHAMMED ABU OADH

Cybersecurity Engineer | SOC Analyst & Incident Management Specialist

📍 Gaza, Palestine 📞 +970 592594180 ✉️ mohammedabuoadh@gmail.com

PROFESSIONAL SUMMARY

Final-year Cybersecurity Engineering student specializing in Security Operations Center (SOC) workflows, Incident Management, and Threat Hunting. Hands-on experience operating SIEM & EDR platforms (Wazuh, Splunk Enterprise) for real-time Security Monitoring, Log Analysis, Cyber Threat Intelligence, and Malware Analysis. Proficient in Vulnerability Management, Firewall Configuration, Network Security, and system administration (Windows Server, Active Directory, Linux) in compliance with security frameworks. Proven ability to execute Security Incident Response and protect enterprise digital assets.

TECHNICAL & SOC SKILLS

• **SOC & Incident Response:**	Security Operations Center (SOC) Operations, SOC Analyst Skills, Incident Management, Security Incident Response, Threat Hunting, Cyber Threat Intelligence, Malware Analysis, Security Monitoring, MITRE ATT&CK Framework.
• **SIEM, EDR & Tools:**	SIEM & EDR Management, Wazuh SIEM/EDR, Splunk Enterprise, SOC Tools, Network Monitoring, Log Analysis, Wireshark, Active Response.
• **Security & Compliance:**	Vulnerability Management, Vulnerability Assessment, Penetration Testing basics, Firewall Configuration & Management, Risk Management, Security Policies & Compliance, Indicators of Compromise (IOCs).
• **Systems & Scripting:**	Network Security, Windows Server, Active Directory (AD), Group Policy Objects (GPO), Linux (Ubuntu, Kali Linux), Search Processing Language (SPL), Java, Bash.

WORK EXPERIENCE

IT & Networking / Security Operations Intern — **Jul 2026 – Aug 2026**

Al-Shifa Medical Complex — *Gaza, Palestine*

- Administered Windows Server environments, Active Directory domains for 150+ users, and enforced Group Policy Objects (GPO) for Security Policies compliance.
- Handled Firewall Configuration and endpoint protection on Linux (Ubuntu) systems, performing risk management to harden infrastructure against threats.
- Managed technical incident response workflows, reducing resolution time by **25%** through effective root-cause log analysis.

Cyber Security Intern — **Aug 2024 – Sep 2024**

Jawwal (Palestine Cellular Communications Co.) — *Gaza, Palestine*

- Executed 120 hours of hands-on Security Operations Center (SOC) training focused on Security Monitoring, SIEM log analysis, and incident management.
- Monitored network security traffic logs using SOC tools to detect suspicious activity, anomalous events, and potential security breaches.
- Evaluated enterprise firewall management strategies and regulatory compliance policies to strengthen data protection.

HANDS-ON CYBERSECURITY HOME LABS

Wazuh SIEM & EDR Detection Lab — **SOC & Incident Response Project**

- Configured a Wazuh SIEM/EDR cluster for continuous log analysis, vulnerability assessment, and automated incident response.
- Built **15+ custom detection rules** mapped to the MITRE ATT&CK framework, implementing Active Response to block malicious IPs automatically.
- Conducted threat hunting and malware analysis simulations, achieving zero-lag security incident response.

Splunk Enterprise Threat Hunting Lab — **SIEM & Cyber Threat Intelligence**

- Deployed Splunk Enterprise ingesting Windows Event Logs, Syslogs, and Firewall Configuration logs for threat intelligence correlation.
- Created advanced SPL queries to track Indicators of Compromise (IOCs), identify failed log-in anomalies, and accelerate threat hunting.
- Built real-time SOC Analyst dashboards and alert triggers, accelerating security incident response time by **30%**.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

CompTIA Security+ (SY0-701) / Junior Cybersecurity Analyst — **Candidate / In Progress**

- Actively preparing for CompTIA Security+ certification covering SOC operations, threat intelligence, vulnerability management, and risk management.

Capture The Flag (CTF) Bootcamp Certificate — **Green Armor Academy & UCAS Engineering Club**

- Completed practical CTF training in penetration testing, network monitoring, vulnerability assessment, and digital forensics.

EDUCATION

Bachelor of Cybersecurity Engineering — **Sep 2021 – Expected Dec 2026**

University College of Applied Sciences (UCAS) — *Gaza, Palestine*

• Final Semester Student | Expected Graduation: Late 2026 / Early 2027.

LANGUAGES

• **Arabic:** Native Language • **English:** B2 (Professional Working Proficiency)
